DETAILED ACTION

Allowable Subject Matter

1. Claims 1,4,6-8,10-12,15,16,18-20,22,25,26,28,29 are allowable over the prior art of record.

2. The following is an examiner's statement of reasons for allowance:

As per independent claims 1,8,15,19,25, and 29, the recited claim limitations pertaining to mapping of personal context information to a default speech model, and identifying a better speech model that is a better mapping to the personal context information, is not explicitly taught by the prior art of record. Furthermore, it would not have been obvious to one of ordinary skill in the art of speech modeling to modify the teachings of the prior art of record to obtain the recited claim limitations of the independent claims as noted above.

With respect to the prior art of record, Junqua et al (6415257) teaches a HMM speaker adaptation which extracts semantics from input speech and generates a new speech model based on this information, however, the reference does not teach the selection of two speech models based on context information, configuring a speech recognizer to use the selected default model, and identifying a better speech model based on the personal initial context information. Curry et al (6493669) teaches the use of a default speech model. Newman (5946654) teaches evaluating all speech models and then dynamically (via scoring) determining which speech model best

aligns with the input utterance, and choosing that particular speech model (col. 6 lines 49-56; col. 7 lines 10-29; col. 59-64; col. 8 lines 20-30).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
